

Access Control

DAMSTRA
CONNECT + PROTECT YOUR WORLD

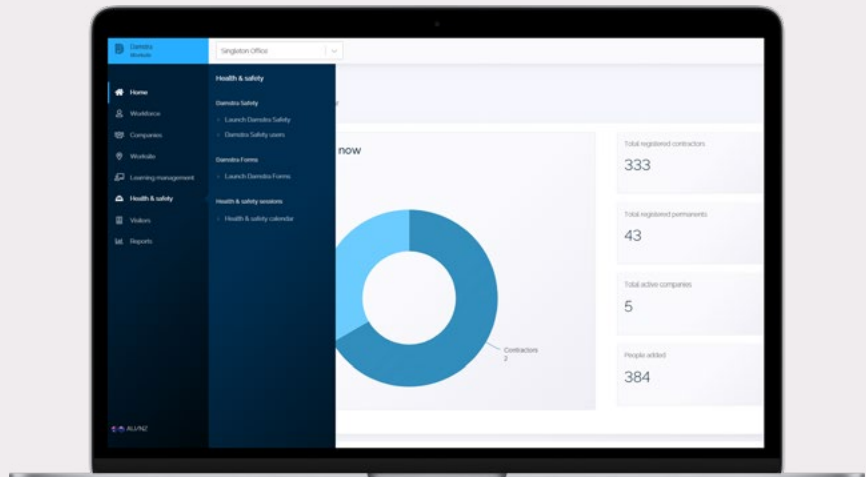

Quick, convenient, trusted, authorised access to the workplace that protects workers, contractors, and visitors.

Damstra's Access Control solution authenticates individuals before being allowed entry for a safe working environment while maintaining workflows and productivity.

Connect + Protect Your World

Access Control verifies employee worksite qualifications and induction compliance at all entry points. Faces are scanned for identification and temperature detection. Worker fatigue, time and attendance, and emergency evacuation protocols are managed across the organization. Turnstiles, gates, and door/lock functionality are integrated and secure the workplace. Trusted, connected access for the right individual that protects the work environment for workers, contractors, and visitors.
