

# Asset Management

**DAMSTRA**  
CONNECT + PROTECT YOUR WORLD

**Accurately track and maintain plant and equipment to ensure assets are optimised for usage and lifecycle.**

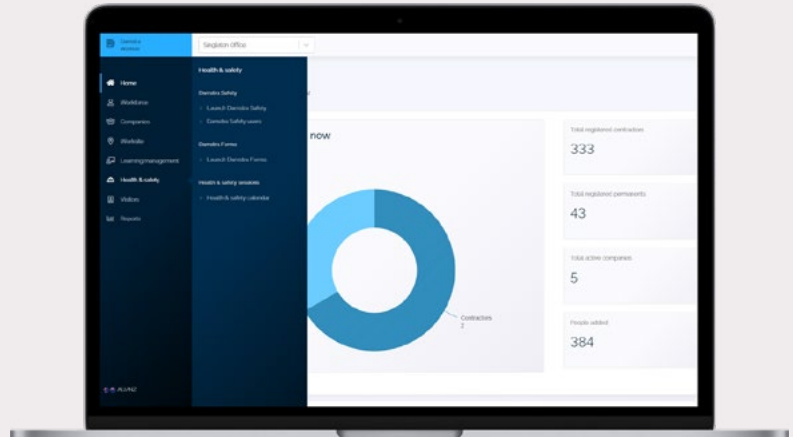

Keep the business operating at optimum levels of performance with Damstra's Asset Management platform. Reduce operational downtime and increase asset life.

# Connect + Protect Your World

Maintain a complete repository of all assets in the organization with in-depth visibility. Know the status of each asset. Analyse the impact of incidents. Access live data, notification, alerting and reporting. Track assets to workers, locations, and other assets.

Easily identify, protect, and track critical assets in a single view through all phases: procurement, maintenance, depreciation, and disposal. Get a timeline of all events to manage the asset life cycle.

Register deliveries, track the destination of materials and equipment as well as allocate them to specific projects and work areas. Update documentation easily.
