Civil assist Australia

After realising paperwork was not for him, Nigel decided to go paperless. This resulted in increased efficiency by streamlining everyday work and providing valuable insights to their worker's progress and needs.

“Gone are the days of needing to chase up supervisors”

Civil Assist Australia have come a long way since they began manufacturing dewatering pumps in 1974 under the name of Groundwater Control. Today, they're recognised as one of Australia's leading ground engineering experts specialising in dewatering, piling, foundations, trenchless technology and environmental management. Working with a range of clients including small private builders, land developers, civil construction companies and local councils, their years of experience ensure each project is completed on-time and fuss-free.

Problem

Providing a professional and fuss free service for customers generates paperwork and lots of it! After returning from holiday to find a pile of paperwork on his desk, Nigel decided enough was enough. He wanted to reduce the paperwork lag from site to office and make processing the paperwork easier, both for staff on site and in the office.

Solution

Paperless

The Damstra Digital Forms app is very easy to use. Form templates are created in-house by Mitchell Plastic Welding and the ability to have drop down selection lists for consistent information is great. The team really enjoy using tablet software.

Solution

Efficiency

Project Engineer Shin Chou, responsible for the system says:

“Damstra Digital Forms has streamlined the way our company handles paperwork. Gone are the days of needing to chase supervisors for outstanding timesheets, JSA’s or daily progress forms!”

“Delivering a value for money solution for the client’s dewatering and trenchless needs. Throughout our 40 years business lifespan we have strived to provide the best customer service coupled with excellent work ethic, and this keeps our customers coming back time and time again. We are always looking for ways to be more innovative and Damstra Digital Forms has streamlined our everyday work, and provided our office staff with invaluable feedback to our worker’s progress/needs, we look forward to our future with Damstra Digital Forms”
