Maximize the performance of Damstra ORCHESTRATE Solutions by smoothly integrating with your existing enterprise application and information systems.

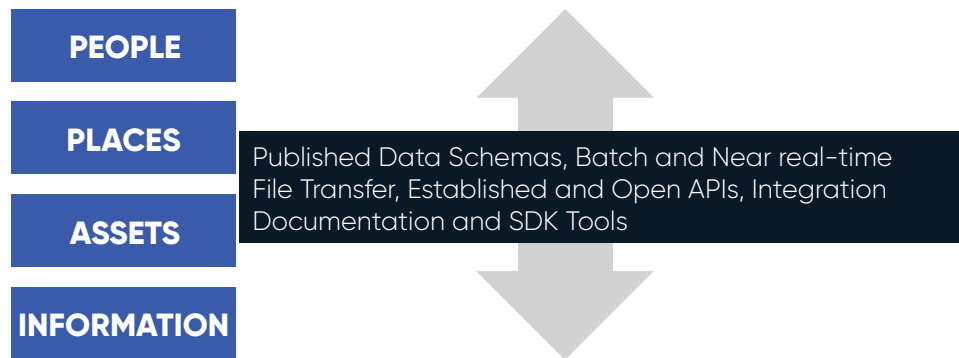

INTEGRATING PEOPLE, PLACES, ASSETS AND INFORMATION

You've made significant investment in strategy, process, tools, equipment and resources. It's often a large challenge to integrate past investment with new tools, systems. Damstra makes this easy so you can have an end-to-end view of the business.

HOW DO WE DO IT?

Designed around industry defined standards and our own published access methods, Damstra customers extend the value of their Damstra solutions across their enterprise by connecting information, processes, reporting and analytics, HSE and compliance-related functionality.

CLOUD, ON-PREM OR HYBRID INTEGRATIONS

Damstra's LINK Solutions adapt to your technical environment—no matter your strategy and implementation architecture. You choose the level and frequency of integration, based on your business requirements, at the pace of your need.

Damstra's development team and our technology are your link to better resource orchestration and protection from risks that keep you from achieving your business objectives.
