

Enterprise Protection Platform (EPP)

DAMSTRA
CONNECT + PROTECT YOUR WORLD

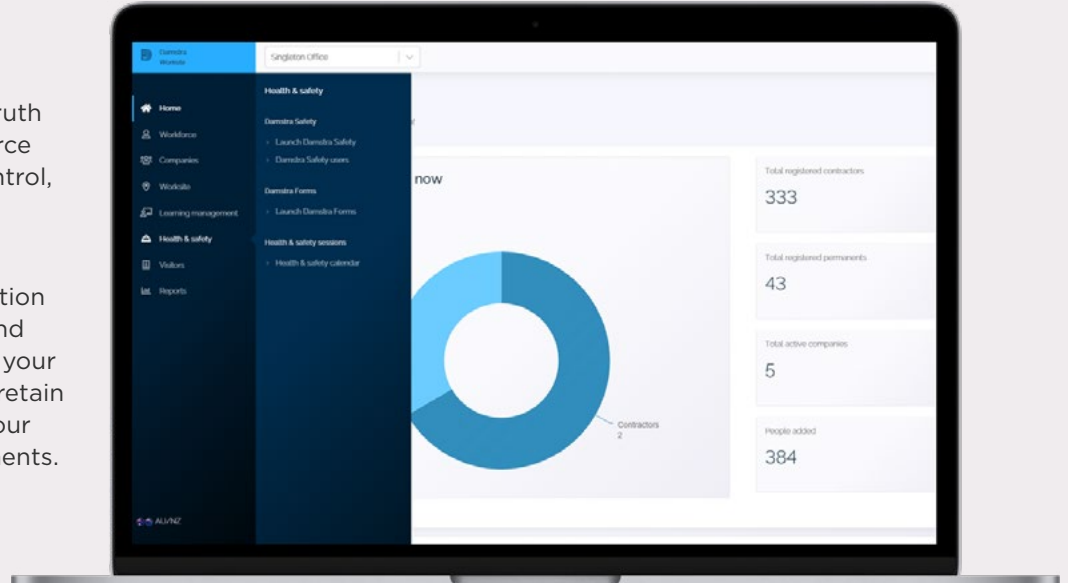

Connect + Protect Your World

Receive outstanding business value by orchestrating across all your different systems, processes, and work locations to ensure the right resources are at the right place, at the right time – and openly communicating with each other – to maximize overall performance and business advantage.

Damstra's Enterprise Protection Platform (EPP)

Harness the power of the EPP with one source of truth from data across Workforce Management, Access Control, Learning, Assets, and the Connected Worker.

Enable process orchestration across all your systems and technologies to optimize your results, while letting you retain and optimally leverage your existing software investments.

PREPARED PEOPLE

SAFE WORKPLACES

CONNECTED ASSETS

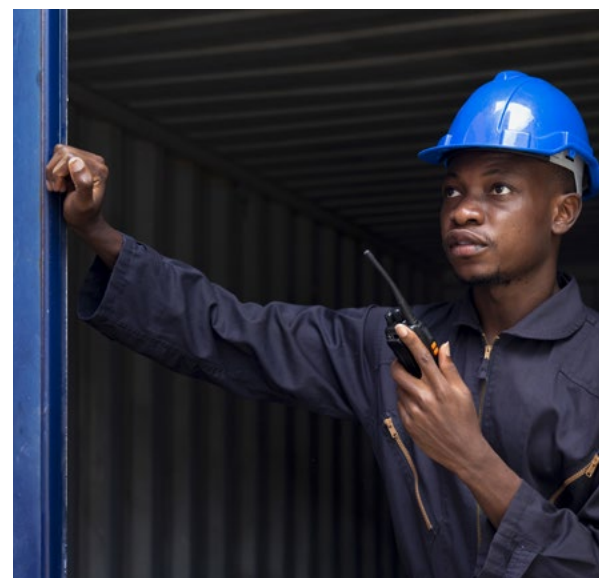

ACCESSIBLE INFORMATION

Damstra's unique EPP is designed to connect and protect your most valuable resources - people, workplaces, assets, and information. With data collected from across the organization, alerts and notifications, worker profiles, contractor management, and asset management, Damstra's EPP delivers access control and real-time reporting to ensure your workers' safety.

The EPP digitizes the processes and tools you need to track, train, and manage all your resources. This means your business will always be compliant and your people completely prepared with the appropriate skills, experience, certifications, and training to keep your entire company safe.

It encompasses all Damstra modules in an easy-to-access single point solution, enabling our customers to orchestrate across all their different systems, processes, and work locations.

Prepared People

Ensure that workers are connected and protected for the greatest performance and value contribution.

- ✓ **Workforce Management** ensures all workers are approved and compliant to be on site
- ✓ **Learning Management** for inductions and training for workforces to be compliant and skilled
- ✓ **Connected Worker** with wearables for lone worker safety, biometrics, contact tracing, fall detection, and continuous connectivity
- ✓ **Contractor Management** information is easily accessible and monitored closely, ensuring their certifications and skills are up to date

Connected Assets

Protect your assets for compliance and investment preservation.

- ✓ **Asset Mobilisation** and registration, site inductions, and certifications and validations for the greatest performance
- ✓ **Asset Management** to track and maintain, and ensure compliance
- ✓ **RFID** to connect assets, people, and workplaces and identify movement between zones
- ✓ **IoT** that collects data to predict maintenance and other outcomes

Safe Workplaces

Go beyond compliance to keep workplaces secure, safe, and productive.

- ✓ **Integrated Access Control** with terminals that integrate facial scanning, temperature detection, alcohol and drug testing
- ✓ **Digital Forms** that are automatically assigned with intelligent workflows, and automatic updates on employee profiles
- ✓ **Safety** to manage risks, incidents, compliance, and safety responsibilities with one source of truth to identify high-risk areas in operations
- ✓ **eLearning** to keep employees current with workplace safety training

Accessible Information

Analyze, report, and predict outcomes with one source of truth from across the organization with information that is connected, integrated, and optimized.

- ✓ **Reporting** that allows your real-time sharing of compliance information
- ✓ **Business Intelligence** tools for visibility at anytime from anywhere
- ✓ **Predictive Safety Analytics** to make informed decisions and help prevent incidents before they happen
- ✓ **Offline Documentation** lets workers update digital forms and documents when out of service
- ✓ **Contractor Management** information is easily accessible along with your workers' information
